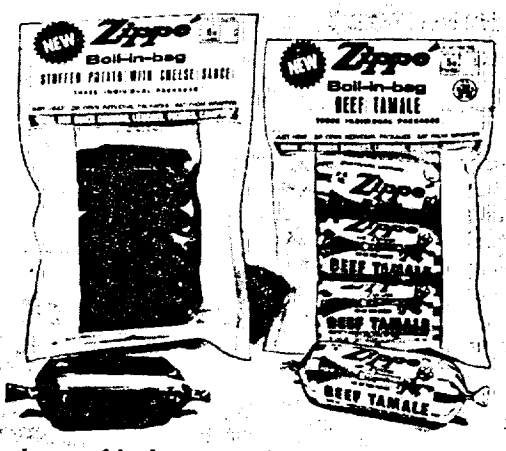
New Concept for Boil-in-Bag Packs

Versatile packages by Milprint are being used by Topmost Foods to pack two new pre-cooked foods in convenient form. Products—tamales and stuffed potatoes—have outer pouches and inner wraps of poly/cello/poly that will not delaminate even after



five hours of boiling. Outside packs for both are flexo printed in three colors, but tamale wrap is flexo printed in four colors and potato wrap printed in three colors by gravure. Both products may be eaten directly from the pouch by means of a pull-string zip-opening device.
